

1. Is this Photo Story linked to a Case Study?

If this is the case, please add the name and link to the relevant Case Study.

No

2. Follow-up: Is the individual in the beginning, middle or end of an activity/program with Save the Children?

If he or she is still taking part in an activity/program in the future please explain when a follow-up story could be planned i.e.: six months, one year later etc.

Is this a follow-up from an earlier Photo Story or Case Study? If so, please add a link to the earlier Photo Story or Case Study.

They are at the beginning of the program intervention.

Follow up could be conducted a year after this date (12/12/2013)

Caption (short)

Haleka, Woldegerima Gebrehiwot, 66 years old is a farmer and father of nine children, three girls and six boys. Woldegerima explains about the vegetable farm land that he is preparing to plant vegetables and fruits at Maydaero village of the Tigray region. Before Save the Children's intervention in the area, Woldegerima and his family used to suffer due to food insecurity. He and his family used to suffer due to recurrent droughts and water shortage. Woldgerima says, "now after receiving the support

	<p>of grafted seedlings and water pump generator from which I pump water from the nearby pond that I prepared, I have been able to prepare seed bed and grow a variety of vegetables such as cabbage, swiss chard, chilli pepper and onions. I have also been able to grow fruits such as apple, guava, avocado and orange. Besides this, I also grow food crops like barley, maize and teff . This year as a result of supplemental irrigation through the water pump I received from the project, I have produced five quintals of teff which is more than the usual yield.”</p> <p>One of his sons has recently graduated from university and is working as a teacher in Humera town. With the income he earned from sales of the extra teff yield, he has set up bee hives near his farmland where he produces for extra income for the family. He is a very ambitious man with big work spirit which has landed him as a model farmer in his community.</p>

Guidance for the Communications Materials templates: Photo Story

The aim of the guidance is to give additional explanatory notes or examples of what is required for different key sections of the templates. In addition, there are references to existing Save the Children guidance.

A Photo Story is a visual way of telling the audience about the situation or issues facing a child or children. It tells the audience how Save the Children's work has made a difference in the life of a child or his or her family.

Caption (short)

Captions should clearly state who is in the photo, where it was taken, and when. Include information about our response if appropriate.

Photos

- Please only use photos in their original file format (i.e.: JPG or TIF etc.) otherwise they will not be a high enough resolution to use.

If possible, try to take the photo in both portrait (height long) and landscape (width long).

Guidance on photography

Here are some basic photography tips for non-professional photographers.
